

Erratum notice

Following the recent publication of the article 'Modified technique for retaining silicone auricular prosthesis: a case report'. Nelogi SY, Chandrashekhar NH, Porwal A. *Eur J Prosthodont Restor Dent.* 2011;**19**(2):62-6., the authors would like to advise they inadvertently overlooked the contribution and participation of an additional author – Dr.Satyabodh S Guttal.

Dr.Guttal had developed a technique which was published in the Journal of Indian Prosthodontic Society. Dr.Guttal had contributed both to the clinical case (in the capacity of a faculty guide) as well as an initial draft of the manuscript. The authors believe that Dr.Guttal's contribution is significant enough (as per ICMJE criteria for authorship) for his inclusion as an author in the paper and sincerely regret the error.

PRESS RELEASE FROM THE UNIVERSITY OF DUNDEE

NEW DEAN APPOINTED TO DENTAL SCHOOL

Professor Mark Hector has been appointed Dean of Dentistry at the University of Dundee.

Professor Hector, who will also occupy a Chair in Oral Health of Children, was previously at Barts and The London School of Medicine and Dentistry.

Between 2009 and 2011 he was President of the International Association of Paediatric Dentistry.

"I am absolutely delighted and very proud to be the new Dean and to be joining a very skilled and committed staff. I look forward to working with them on a number of important new initiatives to build on the Dental School's fine reputation for teaching and research," said Professor Hector.

Mark Hector was born in Nairobi, Kenya, and first graduated in Physiology, then in Dentistry in 1981 from Guys Hospital. There followed three years at the University of Bristol and Kings College, London, after which he received his PhD.

Following three years in oral medicine and pathology at Guys Hospital Dental School he was recruited to The London Hospital Medical College as a lecturer in Child Dental Health. He gained his Readership in 2001 and in 2002 became Professor of Oral Health of Children at Barts and The London School of Medicine and Dentistry. To maintain a degree of sanity he is also a silversmith.

Dundee is one of only three dental schools in Scotland. It is at the forefront of research, teaching and clinical dental practice and benefits from being an integral part of the College of Medicine, Dentistry and Nursing.

The Dental School performs consistently well in league tables for both research and teaching.
